Success – Hungarian universities among the best in the world!

No comments

Photo: www.sed.inf.u-szeged.hu

The University of Szeged (SZTE) came first among all Hungarian universities on an international list compiled on the grounds of the United Nations' Sustainable Development Goals. SZTE was placed between the 101st and 200th place out of the 767 universities ranked.

According to the [Times Higher Education](#), the Times Higher Education Impact Rankings are the only global performance tables that assess universities against the United Nations' Sustainable Development Goals. They use carefully calibrated indicators to provide comprehensive and balanced comparisons across three broad areas: research, outreach, and stewardship.

További infó

More Hungarian universities were ranked, and among them, SZTE became the first, [Szeretlek Magyarorszag reported](#). The University of Debrecen was placed in the 201-

Budapest placed only in the 401-600 category. According to SZTE, the experts who made the list

looked at 17 different areas at each university,

and that is how Szeged could finally win in Hungary.

The ranking measures the economic and social impact of the institutions and compares them to the goals set by the United Nations' Sustainable Development Initiative. The experts who made the list took into consideration not only the teaching-learning processes at the universities but also the research projects conducted there, the good practices of how they operate, and all other factors from which people, the natural environment, the economy, or the governments etc. can benefit.

The University of Szeged became 22nd in the 'life below water' category, meaning that they are the

22nd best in the world in preserving and protecting wildlife below water.

The University of Debrecen came 44th in the good health and well-being category while the University of Pécs is the 45th best in the world in doing the most against climate change.

This is the second time that such a list was made, but it is once again led by New Zealand's University of Auckland. Furthermore, three Australian universities complete the rest of the top four: University of Sydney, Western Sydney University, and La Trobe University. Meanwhile, Japan is the most-represented nation in the table, with 63 institutions, followed by Russia with 47 and Turkey with 37.
