

## MaPLaS+S entrepreneurial skills and self-audit pitching training

Date	21 Sep 2020 – 25 Sep 2020
Location	Online
Target Group	PhD students
Host	University of Szeged, Hungary

The main objective of this training is to contribute to the stable and orderly legal relations of businesses by highlighting the issues that entrepreneurs need to pay attention to.

To become an entrepreneur, a good idea is essential but not enough. To succeed, an entrepreneur needs to know how to organize a business around that idea, how to make decisions and solve problems, how to negotiate, how to comply with legal requirements and last but not least, how to present that idea to investors.

In connection with these, this training aims to contribute to the general understanding of entrepreneurship by introducing students to the economic and legal requirements of operating and developing a business, and by developing problem solving and soft skills needed for a successful entrepreneur.

To reach the target, this training is divided into 4 modules. In the first four days, students will study about specific, business-related issues from different approaches. They will get insight into the basics, purpose, and essence of Management, Problem-solving, Law and Soft skills in an online form. During the first 4 days, students will enrich not only with (ex cathedra) theoretical but also with practical knowledge. In the fifth day, 'future entrepreneurs' can try themselves by demonstrating what they've learnt in a self-audit pitching competition.

No prior knowledge is necessary to take part in the training.

## Certificate/ ECTS

1,5 ECTS credits and certificate

## Language

English
